

Connecting to PGOCS WiFi – MacOS Setup

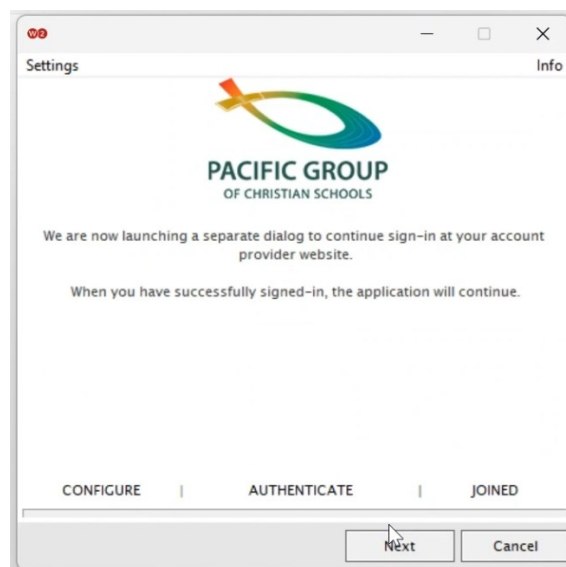

1. Enter the URL: www.pacific.education/studentwifi
2. The portal will detect your device operating system – click **Join Now** to Download installer

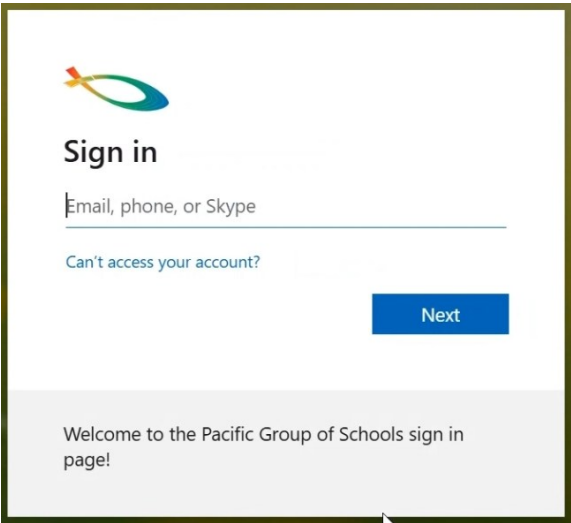

3. Open and run the installer (this may be in the Downloads folder):

WiFi_JoinNow_Wrapper.dmg

4. The installer will open and progress through the configuration

5. When prompted enter **School Email and Password**

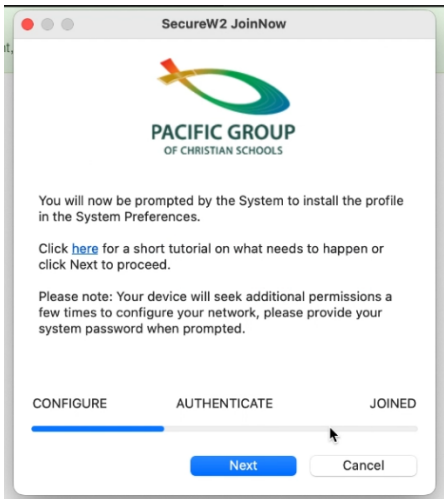

The image shows a web-based sign-in page. At the top left is a logo consisting of a stylized 'P' in green and blue with a red and yellow swoosh. Below the logo is the text 'Sign in'. Underneath is a text input field with the placeholder text 'Email, phone, or Skype'. Below the input field is a link that says 'Can't access your account?'. To the right of the link is a blue button labeled 'Next'. At the bottom of the page, there is a grey footer area with the text 'Welcome to the Pacific Group of Schools sign in page!'.

6. Enter **Computer Administrator Password**

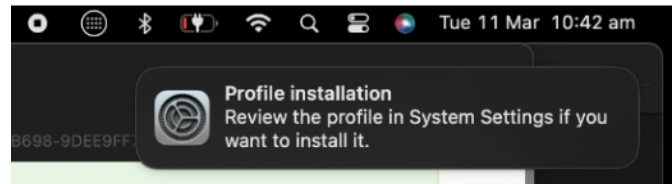

The image shows a macOS-style system dialog box titled 'SecureW2 JoinNow'. It features a yellow padlock icon at the top. The text inside reads: 'Wi-Fi_JoinNow_Wrapper wants to make changes.' followed by 'Enter your password to allow this.' There are two text input fields: the first is labeled 'Administrator' and the second is labeled 'Password'. At the bottom are two buttons: 'Cancel' and 'OK'.

7. Click **Next** to continue to Profile Installation

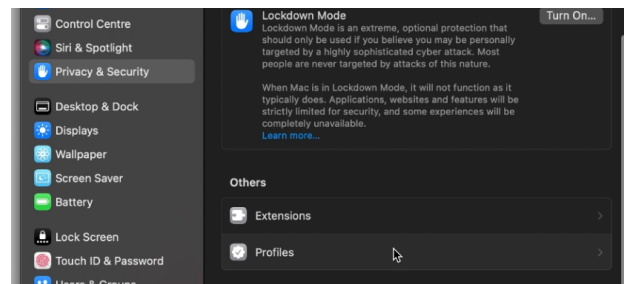

The image shows a macOS-style window titled 'SecureW2 JoinNow'. It features the Pacific Group of Christian Schools logo at the top. The text inside reads: 'You will now be prompted by the System to install the profile in the System Preferences.' followed by 'Click [here](#) for a short tutorial on what needs to happen or click Next to proceed.' Below this is a note: 'Please note: Your device will seek additional permissions a few times to configure your network, please provide your system password when prompted.' At the bottom, there is a progress bar with three stages: 'CONFIGURE', 'AUTHENTICATE', and 'JOINED'. The 'CONFIGURE' stage is currently active, indicated by a blue bar. Below the progress bar are two buttons: 'Next' and 'Cancel'.

8. Click on the **Profile Installation notification** at the top right of the screen

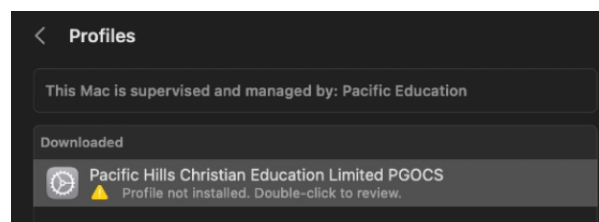

If you don't receive the notification, open System Setting app

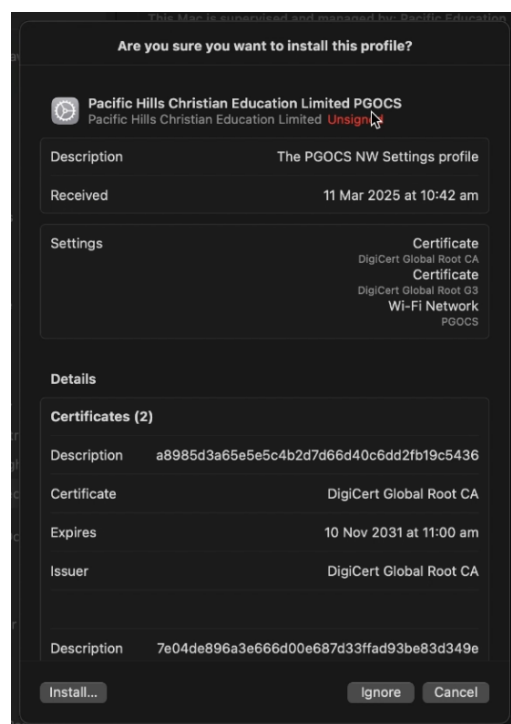

9. Scroll down the **Privacy and Security** page in System Settings and select **Profiles**

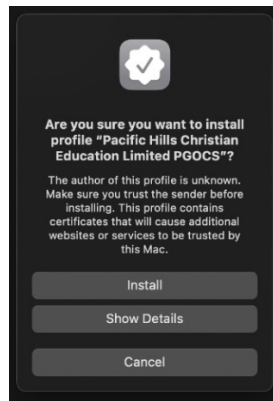

10. You will see a downloaded profile ready for installation – **Double-click to review**

11. Click **Install** in the lower left

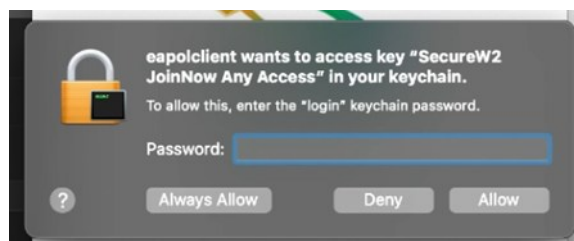

12. Click **Install**

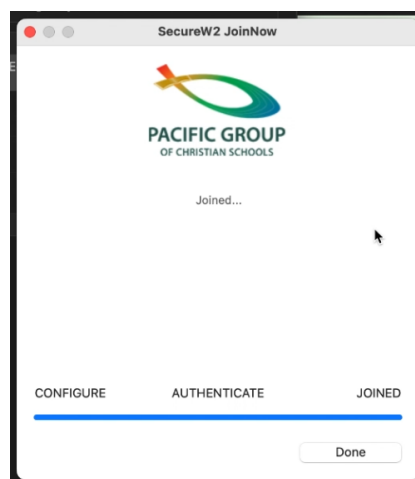

Enter **Computer Administrator Password**

13. You could be prompted for at least one Keychain request. Enter **Computer Administrator Password** and select **Always Allow**.

14. MacOS configuration is now complete

15. Verify success by checking connected network
